### **JOINT STATEMENT OF THE CLME+ ICM MEMBERSHIP AND SECRETARIAT**

**emanating from the 7th ICM Meeting celebrated in March 2020**

From 18 to 20 March 2020 the Members and Secretariat of the CLME+ Interim Coordination Mechanism (ICM) for integrated Ocean Governance in the wider Caribbean convened for a 7<sup>th</sup> time. In light of the ongoing novel coronavirus crisis, the meeting was held via teleconference.

In times where the whole planet is being tremendously challenged, meeting participants jointly acknowledged and underscored, now even more than ever, the **crucial importance of duly protecting and sustainably managing the living marine resources and marine environment, as a critical resource base to support region-wide socio-economic development: healthy seas will allow coastal states to rebound, faster and better, whenever disasters strike** - be those a consequence of climate change or the current global pandemic.

Bringing together 10 Inter-Governmental Organizations with an oceans-related mandate, the meeting discussed, among other matters:

- *the creation of a permanent facility to provide long-term support towards oceans-based sustainable development in the wider Caribbean*
- *a collaborative Work Plan for 2020*
- *the further development of the online “CLME+ Hub” as the common, collaborative Knowledge Management Platform for ocean-positive action in the wider Caribbean*

At present, the CLME+ SAP ICM consists of the following Inter-Governmental Organizations (IGO's) with an oceans-related mandate: UNEP CEP (represented through the Cartagena Convention Secretariat), FAO-WECAFC, IOCARIBE of the IOC of UNESCO, CRFM, OSPESCA, CCAD, OECS Commission, and the CARICOM Secretariat. The Chair of the ICM is IOCARIBE, with the Cartagena Convention Secretariat acting as the Co-Chair. Operations of the ICM are supported by the UNDP/GEF CLME+ Project. The UNOPS Project Coordination Unit of the CLME+ Project currently acts as the ICM Secretariat.

The 7<sup>th</sup> Meeting of the CLME+ SAP ICM:

- Reaffirmed their commitment to implementing a programmatic, collaborative and well-coordinated approach towards the up-scaling of action on the living marine resources and marine environment, in support of the politically endorsed 10-year CLME+ Strategic Action Programme (2015-2025)
- Agreed to support ongoing and emerging efforts to ensure greater collaboration and synergies among national, sub-regional and regional ocean-related projects, to reduce overlap and duplication, and to ensure maximum benefits to the countries and peoples of the region
- Adopted the *CLME+ Hub (www.clmeplus.org) as their common regional platform of reference, and promote its further development and wide-spread use*
- Agreed to support the ongoing efforts to consolidate and institutionalize the regional coordination mechanism

For more information on the CLME+ ICM and the CLME+ Initiative, and the work of its Members, we invite you to regularly visit: [www.clmeplus.org](http://www.clmeplus.org) as well as the ICM Member websites.
