

Data Collection Reference Framework

Task VI – Socio Economics

Marc Taconet (marc.taconet@fao.org)

Task VI: as a start limited number of indicators:

- **Task VI.1: Employment**
- *Employment in the fishery sector is a useful indicator of the importance of the fishery sector in the region. This indicator aims to present number of fishers by category (fully employed or part time ones), by gender (male / female) by the major fleet, and area for the reference year*

- **Task VI.1: Employment**

Field	Definition
Country	The alpha-3 ISO code for the country (see appendix 1)
Year	Reference year for reporting
Area	See appendix 2.4 for regional subareas' definition
Gender	Male or Female
Age Group	Intervals of age defining the group
Category	Full-time fisher / part-time fisher by major fleet and area (port)
Count of fishers	Number of fisher for the considered gender / category
Others?	To be discussed during the FDS WG 1rst meeting

Discussion: other socio-economic indicators?

Thank you for your attention
