Notes:

- Quality has been checked only for Capture fisheries.
- 'YES' indicates the country has submitted data to FAO, 'No data' indicates the country has replied to FAO's request, but no data was available for submission.
- 'Good quality' indicates the country's submission is at a high enough standard (including species breakdown) that there is no need for editing or estimations applied by FAO.
- If data is obtained through another RFMO, it means the country has vessels flagged for fishing in high seas or other convention areas (e.g. SEAFO).
